

ATTENTION SOUTH DAKOTA TELECOM PROVIDERS!

Effective October 24, 2021, MANDATORY 10-digit local dialing is required for all customers in the South Dakota 605 Area Code

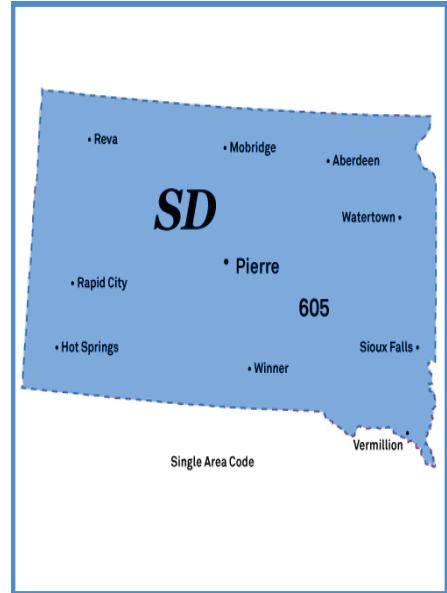

Why is the local dialing plan changing?

On July 16, 2020, the FCC adopted an Order (FCC 20-100) approving 988 as the 3-digit abbreviated dialing code to reach the National Suicide Prevention Lifeline, starting July 16, 2022. Customers must continue to dial 1-800-273-TALK (8255) to reach the Lifeline until July 16, 2022.

The Order requires all telecommunications carriers, interconnected Voice over Internet Protocol (VoIP) providers, and one-way VoIP providers (covered providers) to make any network changes necessary to ensure that users can dial 988 to reach the existing National Suicide Prevention Lifeline by July 16, 2022. In order for 988 to work in the South Dakota 605 area code, 10-digit local dialing must first be implemented.

Does this apply to South Dakota?

Yes. Implementation of this Order requires all covered providers to make 10-digit dialing mandatory for all local calls in the entire South Dakota 605 area code (shown in blue on the map) because 988 is assigned to customers as a working prefix.

Why is 10-digit dialing going to be required in this area code?

The FCC ordered that any area code that has the 988 prefix assigned and has 7-digit local dialing be transitioned to 10-digit local dialing to ensure everyone is able to reach the National Suicide Prevention Lifeline using the 3-digit 988 code.

Will everyone in the 605 area code have to dial 10-digits for local calls?

Yes. Every customer in the entire 605 area code has to change to mandatory 10-digit dialing for local calls. Dialing 7-digits for local calls will be prohibited for all customers in the 605 area code.

What will be the new dialing procedure?

To complete local calls, the new dialing procedure requires callers to dial the area code + telephone number in the 605 area code. This means that all local calls in the entire 605 area code that are currently dialed with 7-digits will need to be dialed using the new dialing procedure.

When will the dialing change begin?

Beginning **April 24, 2021**, you should start dialing 10-digits (area code + telephone number) for all local calls in the 605 area code. If you forget and dial just 7-digits, your call will still be completed. **All telecom providers operating in the affected NPAs are required to implement permissive 10-digit dialing in their networks no later than April 24, 2021.**

When will the dialing change become mandatory?

Beginning **October 24, 2021**, you must dial 10-digits in the 605 area code. On and after this date, local calls dialed with only 7-digits may not be completed, and a recording will inform you that your call cannot be completed as dialed. If you get this recording, you must hang up and dial again using 10-digits (area code + telephone number). **All telecom providers operating in the affected NPAs are required to implement mandatory 10-digit dialing in their networks no earlier than October 24, 2021 and no later than July 15, 2022.**

What other changes need to be made?

In addition to changing your dialing patterns, all services, automatic dialing equipment, or other types of equipment that are programmed to complete local calls using only 7-digit numbers will need to be reprogrammed to complete calls to 10-digit numbers. Some examples are:

- life safety systems or medical monitoring devices
- PBXs
- fax machines
- Internet dial-up numbers
- fire or burglar alarm and security systems or gates
- speed dialers
- mobile or other wireless phone contact lists
- call forwarding settings
- voicemail services and other similar functions

Be sure to check your website, personal and business stationery, advertising materials, personal and business checks, contact information, your personal or pet ID tags, and other such items to ensure the area code is included.

What will remain the same?

- Your telephone number, including current area code, will not change
- The price of a call, coverage area, or other rates and services will not change due to the dialing change
- What is a local call now will remain a local call regardless of the number of digits dialed
- You will continue to dial 1+ the area code + telephone number for all long-distance calls
- You will continue to dial a prefix (such as "9") when dialing from a multi-line telephone system (e.g., in a hotel, office building, etc.) as required
- You can still dial just three digits to reach 711 (relay services) and 911 (emergency services)
- If 211, 311, 411, 511, 611, or 811 are currently available in your community, dial these codes with just three digits
- The National Suicide Prevention Lifeline can still be reached by dialing 1-800-273-8255 (TALK) even after the 988 code is in effect

Will telecom providers have to do anything if their customers already dial 10-digits for local calls?

Yes, telecom providers whose customers already dial 10-digits for local calls in the 605 area code still have to respond to NANPA with an email to 988@somos.com that includes the company name, OCN/s, and the affected state/area code affirming that 10-digit dialing is in place.

When can I begin dialing “988” to reach the National Suicide Prevention Lifeline?

Beginning **July 16, 2022**, dialing “988” will route your call to the National Suicide Prevention Lifeline. Customers must continue to dial 1-800-273-8255 (TALK) to reach the Lifeline until July 16, 2022.

Still have questions?

You may contact NANPA at 988@somos.com with questions about the dialing procedure change, or you may visit the FCC website at <https://www.fcc.gov/suicide-prevention-hotline>.
